SUMMARY

Software Engineer focused on full-stack development with strong specialization in backend engineering, scalable systems, and problem solving, backed by hands-on industry experience. Passionate about building reliable software and continuously learning emerging technologies.

EXPERIENCE

Akar Inti Teknologi

Nov. 2025 – May. 2026

Software Engineer Intern

Jakarta, Indonesia

- Develop and maintained backend modules for an ERP system using Spring Boot and PostgreSQL, delivering scalable and reliable business features.
- Designed secure authentication and login mechanisms using Redis-based session management to improve API security and stability.
- Refactored legacy code by applying SOLID principles and clean code practices, improving maintainability and reducing technical debt.
- Contributed to frontend development across multiple modules, ensuring seamless integration between UI and backend services.
- Collaborated with frontend and infrastructure teams in delivering features, troubleshooting issues, and supporting smooth software delivery.

Universitas Pendidikan Indonesia

May 2025 – Dec. 2025

Research Assistant

Bandung, Indonesia

- Led end-to-end full-stack development of **Toeflify**, a TOEFL preparation platform integrated with Generative AI.
- Built interactive and responsive interfaces using Next.js and Tailwind CSS for practice and assessment modules.
- Integrated Generative AI APIs to provide real-time essay feedback and automated score analysis.
- Conducted usability testing and collaborated in research validation to improve user experience and system effectiveness.

Kelurahan Isola

Sep. 2024 – Dec. 2024

Full-Stack Developer Intern

Bandung, Indonesia

- Designed and developed a full-stack online document management system to streamline administrative services.
- Built responsive frontend applications with 30+ screens using Flutter.
- Developed and maintained 55+ REST API endpoints using Python and FastAPI for core system functionalities.
- Managed database design and end-to-end client-server integration across the full development lifecycle.

SMKN 13 Bandung

Feb. 2023 – Jun. 2023

Web Developer

Bandung, Indonesia

- Developed a student organization profile website using the Laravel framework.
- Designed the website's UI/UX to provide an intuitive and responsive user experience.
- Performed testing and bug fixing to ensure website functionality and reliability.

EDUCATION

Universitas Pendidikan Indonesia

B.S. in Computer Science

Sep. 2021 – Aug. 2025

Bandung, Indonesia

- GPA: 3.86/4.00 (CumLaude)
- **Thesis:** Developed an AI-driven NPC dialogue system for RPGs using LLaMA 3, LangChain, and FAISS with Retrieval-Augmented Generation (RAG).

Bangkit Academy (Led by Google, GoTo, Traveloka)

Mobile Development Cohort

Aug. 2023 – Jan. 2024

Remote, Indonesia

- Developed Android applications using Kotlin and integrated RESTful APIs for mobile solutions.
- Built capstone project involving AI-powered features and mobile application development.
- Gained hands-on exposure to applied machine learning concepts, mobile engineering, and collaborative product development.

PROJECTS

KostHub WebGIS | React.js, Generative AI

- Built a WebGIS-based boarding house search platform for the Bandung area with interactive map exploration and property discovery.
- Integrated Generative AI features for intelligent kost search and agent-based budget prediction tailored to user preferences.
- Developed responsive React.js frontend components and data visualization interfaces to improve search usability and decision support.

Toeflify (Prototype) | React.js, Generative AI

- Designed and developed the initial prototype of an AI-powered English learning platform featuring CEFR-based essay assessment.
- Integrated Generative AI for automated feedback and multiple-choice question generation as part of the competition solution.
- This prototype later evolved into a broader research platform developed during my Research Assistant role.

CERTIFICATIONS & ACHIEVEMENTS

- [BNSP Database Administrator](#)
- [Alibaba Cloud Certified Associate Database](#)
- [Cloud with AWS Fundamentals](#)
- [DevOps Fundamentals](#)
- [Finalist MAPID WebGIS Competition 2025](#)
- [3rd Place in Technology Innovation Competition DIMAS-TI 2024](#)

TECH STACK

- **Languages:** Java, Python, JavaScript
- **Frameworks:** Spring Boot, React.js, Next.js, Flutter, FastAPI
- **Databases:** PostgreSQL, MySQL, Redis
- **Tools:** Git, Docker, Jira, Bitbucket, Figma
